SUMMARY

Enthusiastic and detail-oriented DevOps Engineer with hands-on experience in AWS Cloud, Docker, Terraform, CI/CD pipelines, and Linux administration. Skilled in automating infrastructure provisioning, deploying containerized applications, and managing cloud environments using Infrastructure as Code (IaC). Proficient in Python, Git/GitHub, Shell scripting, Kubernetes, Helm, Jenkins, Argo CD, Prometheus, Grafana, ELK stack, Ansible, and AWS services including EC2, S3, ECS, ECR, Lambda, IAM, Load Balancer, and CloudWatch. Strong problem-solving and monitoring & logging experience, with a passion for building scalable, reliable systems.

EXPERIENCE

Nextenti Tech Private Limited, Cloud & DevOps Engineer

Sep 2025 – Present • Hyderabad, Telangana, India

- Work with AWS Lambda, S3, VPC, IAM, and Load Balancer to support secure, scalable cloud infrastructure.
- Apply AWS Solutions Architecture knowledge to streamline cloud operations and infrastructure design.
- Collaborate cross-functionally to deliver reliable, production-ready deployments.

Nextenti Tech Private Limited, Cloud & DevOps Intern

Mar 2025 – Aug 2025 • Hyderabad, Telangana, India

- Automated application deployment pipelines using Docker, Terraform, and GitHub Actions CI/CD workflows.
- Deployed and managed containerized applications on AWS EC2 and ECS; implemented IaC practices on Linux-based servers.
- Managed source code using Git/GitHub and collaborated with team members on deployment activities.
- Monitored cloud infrastructure using CloudWatch, Prometheus, and Grafana, and improved deployment reliability.
- Developed Python automation scripts and gained hands-on experience with AWS EC2, S3, ECR, Lambda, and CloudWatch.

PROJECTS

Netflix Clone – CI/CD & Container Deployment

- Deployed a Netflix-clone web application using Docker containers, with automated builds via a Jenkins CI/CD pipeline.
- Integrated SonarQube and Trivy into the pipeline for code quality checks and container vulnerability scanning.
- Managed source code and pipeline triggers through Git/GitHub for continuous integration on every commit.

AWS Infrastructure Automation

- Provisioned and managed AWS infrastructure, including VPC, EC2, S3, and IAM, using Terraform for Infrastructure as Code.
- Automated environment setup and teardown, reducing manual provisioning effort and configuration drift.
- Structured Terraform modules for reusability, enabling consistent, repeatable deployments across environments.

Banking Microservices Platform

- Containerized a microservices-based banking application using Docker and deployed it to a Kubernetes cluster.
- Configured Kubernetes Deployments, Services, and ConfigMaps to manage service networking and configuration.
- Set up monitoring and centralized logging for service health using Prometheus and Grafana.

Centralized Log Monitoring & Alerting Platform

- Built a Docker-based centralized log monitoring and alerting platform using Flask, Fluent Bit, and Elasticsearch.
- Visualized logs and metrics through Grafana dashboards for real-time infrastructure observability.
- Configured automated Slack webhook alerts to notify the team of anomalies and system issues.

EDUCATION

Pace Institute Of Technology And Sciences

B.Tech • Information Technology • CGPA: 7.1

LICENSES & CERTIFICATIONS

- Ansible (Level 1) — KodeKloud
- Terraform (Level 1) — KodeKloud
- Kubernetes (Level 1) — KodeKloud
- Docker (Level 1) — KodeKloud
- Jenkins (Level 1) — KodeKloud
- Git (Level 1) — KodeKloud

SKILLS

AWS Cloud Fundamentals (EC2, S3, ECS, ECR, Lambda, IAM, Load Balancer, CloudWatch) • Docker • Terraform • CI/CD • GitHub Actions • Jenkins (Basics) • Kubernetes Basics • Helm • Argo CD (Basics, GitOps) • Ansible • Prometheus • Grafana • ELK Stack (Elasticsearch) • Python Scripting • SQL • Shell Scripting • Basic Networking (HTTP/HTTPS, DNS, TCP/IP, SSL/TLS)
